COUNTRY BRIEF · NOVEMBER 2026

Côte d'Ivoire: grid and electricity access

Mission 300 compact country

14 M
people live without night-time light, a proxy for no power

96%
of them live within 15 km of a power line

22,800
km of mapped and predicted power lines, all voltages

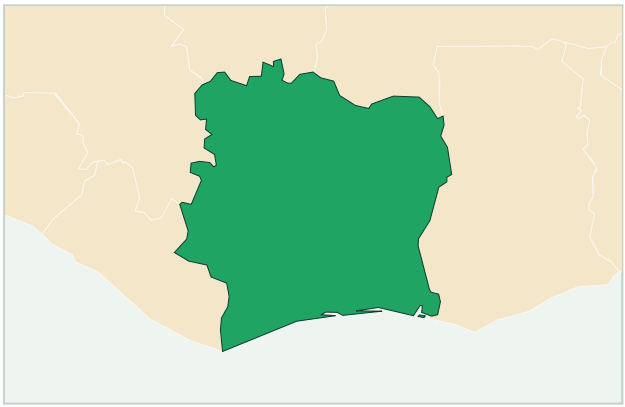

64%
electricity access, as stated in the compact (2023)

100%
access target in the Mission 300 compact (2030)

About 14 million people in Côte d'Ivoire live where satellites see no electric light at night, and 96% of them live within 15 km of a power line. This page brings together what our grid-edge screening and Côte d'Ivoire's Mission 300 energy compact say about who still needs power, how close the grid is and what the country has committed to.

WHAT THIS MEANS

To reach 100% electricity access by 2030, Côte d'Ivoire needs to add about 5 percentage points a year from 2023: from 64% today.

NEAR THE GRID, NOT ON IT

About 14 million people in Côte d'Ivoire, roughly 54% of the population, live where satellites see no electric light at night. Of them, 96% live within 15 km of a mapped or predicted power line: 5.2 million within 2 km, 8.3 million 2 to 15 km away, and 553,000 farther out. The largest group lives 2 to 15 km out: close enough to plan for the grid, too far for a quick connection. That is where mini-grids built to join the grid later can do the most good.

Within 2 km of a line: **5.2 million** (37%)
2 to 15 km: **8.3 million** (59%)
More than 15 km: **553,000** (4%)

"Without night-time light" is a satellite proxy, not a measured access rate.

THE GRID TODAY

Gridfinder, which combines OpenStreetMap lines with medium-voltage lines predicted from night-time lights, maps about 22,757 km of existing and likely power lines in Côte d'Ivoire. That includes lower-voltage distribution lines, so it is not comparable with the high-voltage totals on our grid-atlas country pages. We have not yet built a detailed grid atlas for this country.

People without night-time light, by distance to a line

Distance	Million people	Share
Within 2 km of a line	5.16	37%
2 to 15 km	8.28	59%
More than 15 km	0.55	4%
Total	**13.99**	**100%**

MISSION 300 COMPACT

Côte d'Ivoire's Mission 300 energy compact commits to raising electricity access from 64% to 100% by 2030. New access is planned as 66% grid, 19% mini-grids and 15% standalone solar.

Electricity access

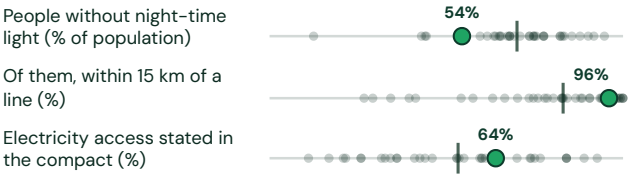

Now: **64%** (2023) Target: **100%** (2030)

Mission 300 energy compact

Commitment	Value
Planned split of new access	grid 66%, mini-grids 19%, standalone solar 15%
Clean cooking target	from 20% to 50% by 2030
Private investment sought	US$1.94 billion
Rules for mini-grids when the grid arrives	Yes
E-waste commitment	No

HOW IT COMPARES

Each dot is one country with a page on aloeenergy.org; the line marks the median. Positions only, no ranking.
